

AI USAGE DISCLOSURE

Student information

Name: AaroHi Verma
Matriculation number: 4742978
Project title: Value-to-Reaction Time Mappings in Decision Making
Group members, if applicable: Lakshay Gupta ; Ayushi Chauhan

AI use statement

Please tick one option:

☐ **No AI tools used.**

I confirm that I did not personally use generative AI tools, AI-based writing assistants, translation tools, image generators, code assistants, or similar AI systems in preparing my contribution to this project.

☒ **AI tools used and disclosed below.**

I confirm that I used AI tools only in limited and transparent ways that preserved the independent character of my work. I remain fully responsible for the accuracy, academic integrity, citations, methodology, code, analyses, and final submitted content.

Details of AI use

If no AI tools were used, write “Not applicable” in the first row.

AI tool used	Purpose of use	Parts of the project affected	Extent of use / student responsibility
Large Language Model (ChatGPT)	Debugging Python code, and clarifying specifics implementation issues	Mainly the analysis of reaction time and troubleshooting issues such as missing value_difference columns and errors when fitting and evaluating the RT model.	I used ChatGPT to troubleshoot coding issues and understanding errors, search as missing columns or incorrect model function arguments.
Large Language Model (ChatGPT)	To help with the structure of the report section describing the Exponential Indifference Model and its results.	Mainly the Models, Predictive Performance and Discussion sections of the report, where I described and evaluated the Exponential Indifference RT model.	Used to improve the organization of my own work on the Exponential Indifference model.

Prompt log

Did you retain a prompt log or notes documenting the AI-assisted steps?

☒ Yes, attached or available upon request.

☐ No AI tools were used.

☐ No prompt log was retained. Explanation: _____

Individual contribution and responsibility

Briefly describe your own contribution to the project, including report writing, coding, modelling, analyses, figures, or interpretation of results:

I was primarily responsible for evaluating the Exponential Indifference reaction-time model. I implemented the likelihood functions, carried out the parameter recovery and test–retest reliability analyses for this model, and evaluated its predictive performance against the baseline. I also contributed to the related Models, Predictive Performance, and Discussion sections of our joint report.

In the case of a group project, I confirm that I have reviewed the shared report, code, analyses, and figures to which I contributed. I accept responsibility for my own contribution and for any AI-assisted material included in shared components that I reviewed, used, or submitted as part of the project.

Final confirmation

I confirm that I have not submitted AI-generated content as my own without review, verification, and disclosure. I have checked all factual claims, references, data, code, analyses, and interpretations myself. I have not entered sensitive, personal, confidential, or copyright-protected material into AI systems in violation of data protection, copyright, or course rules.
