

AI USAGE DISCLOSURE

Student information

Name: Lakshay Gupta
Matriculation number: 4767898
Project title: Value-to-Reaction Time Mappings in Decision Making
Group members, if applicable: Aarohi Verma (4742978), Ayushi Chauhan (4767901)

AI use statement

Please tick one option:

☐ **No AI tools used.**

I confirm that I did not personally use generative AI tools, AI-based writing assistants, translation tools, image generators, code assistants, or similar AI systems in preparing my contribution to this project.

☒ **AI tools used and disclosed below.**

I confirm that I used AI tools only in limited and transparent ways that preserved the independent character of my work. I remain fully responsible for the accuracy, academic integrity, citations, methodology, code, analyses, and final submitted content.

Details of AI use

If no AI tools were used, write “Not applicable” in the first row.

AI tool used	Purpose of use	Parts of the project affected	Extent of use / student responsibility
Large Language Model (Gemini)	Language/grammar correction and help with LaTeX formatting	Main report (Methods, Results, and Discussion sections)	Used to polish the clarity of my original drafts and format LaTeX tables/equations. All substantive arguments and interpretations are entirely my own.
Large Language Model (Gemini)	high-level brainstorming and optimization		Used AI to brainstorm optimization strategies, specifically suggesting the idea of using randomized multi-start initializations to prevent the optimization algorithm from getting trapped in local minima. I independently implemented the restart logic in Python, tested the code, and fully understand the mathematical justification for this approach.

Prompt log

Did you retain a prompt log or notes documenting the AI-assisted steps?

- ☒ Yes, attached or available upon request.
- ☐ No AI tools were used.
- ☐ No prompt log was retained. Explanation:

Individual contribution and responsibility

Briefly describe your own contribution to the project, including report writing, coding, modelling, analyses, figures, or interpretation of results:

I was primarily responsible for specifying, coding, and evaluating the "Magnitude + Conflict" reaction time model. I developed the likelihood functions, ran the parameter recovery and test-retest reliability analyses for this specific model, and compared its predictive performance against the choice-only baseline. Additionally, I assisted with the initial data preprocessing pipeline and contributed significantly to drafting the Methods and Results sections of our joint report.

In the case of a group project, I confirm that I have reviewed the shared report, code, analyses, and figures to which I contributed. I accept responsibility for my own contribution and for any AI-assisted material included in shared components that I reviewed, used, or submitted as part of the project.

Final confirmation

I confirm that I have not submitted AI-generated content as my own without review, verification, and disclosure. I have checked all factual claims, references, data, code, analyses, and interpretations myself. I have not entered sensitive, personal, confidential, or copyright-protected material into AI systems in violation of data protection, copyright, or course rules.
